BILL NO. S-89-01- 15

SPECIAL ORDINANCE NO. S- 28-89

AN ORDINANCE approving the awarding of Reference #9PKD0176 by the City of Fort Wayne, Indiana, by and through its Department of Purchasing and Milan Center Feed Mill for the Fort Wayne Children's Zoo.

NOW, THEREFORE, BE IT ORDAINED BY THE COMMON COUNCIL OF THE CITY OF FORT WAYNE, INDIANA;

SECTION 1. That Reference #9PKD0176 between the City of Fort Wayne, by and through its Department of Purchasing and Milan Center Feed Mill for the Fort Wayne Children's Zoo, respectfully for:

> the purchase of animal food for the Fort Wayne Children's Zoo to fulfill their needs for 1989;

involving a total cost of Ten Thousand and no/100 Dollars ($10,000.00), all as more particularly set forth in said Reference #9PKD0176 which is on file in the Office of the Department of Purchasing, and is by reference incorporated herein, made a part hereof, and is hereby in all things ratified, confirmed and approved.

SECTION 2. That this Ordinance shall be in full force and effect from and after its passage and any and all necessary approval by the Mayor.

Councilmember

FROM: DEPARTMENT OF PURCHASES

APPROVED BY: Gloria J. Goeglein
Gloria J. Goeglein, Director

DATE: JANUARY 17, 1989

SUBJECT: AWARD OF REFERENCE NO. 9PKD0176

****

FILE # ASSIGNED BY RECORDS LIBRARIAN

****

ACTION REQUESTED: Please prepare an ordinance to be introduced in City Council on January 24, 1989, approving the award of Reference No. 9PKD0176 with respect to the purchase of animal food for the FW Children's Zoo. The monies will come from Park Department funds. The cost reflects the most responsible vendor and should be awarded to Milan Center Feed Mill in the amount of $10,000.00 + or -. The vendor is an only source for this particular type of diet. Please refer to the attached specifications to substantiate ordering in this manner. The amount requested will fulfill their needs for 1989. A price agreement purchase order will be assigned upon Councilmanic approval.

The following food items are needed to feed zoo animals from now until the end of 1989:

Item	Weekly Use	Needed through 12/31/89
Oatmeal	20 lbs.	1,200 lbs.
Rodent lab chow	4 lbs.	240 lbs.
Sunflower seed	25 lbs.	1,500 lbs.
Guinea pig pellets	100 lbs.	6,000 lbs.
Poultry starter	50 lbs.	3,000 lbs.
Trout chow	100 lbs.	6,000 lbs.
Country pal (16% protein, 3/8-1/2 inch extruded pellets)	700 lbs.	42,000 lbs.
Back-40 Starter-Grower	100 lbs.	6,000 lbs.
Goat Power	1,000 lbs.	60,000 lbs.
Pig Grower (only used summer months)		1,000 lbs.
Whole corn	350 lbs.	21,000 lbs.
Mineralized salt block	7 lbs.	420 lbs.
Oyster shell	7 lbs.	420 lbs.

Food needs may change with changes in animal collection.
Current vendor: Milan Center Feed Mill
Contact: Lynn, 657-5461

Notes on vendor and products:

1. With the exception of whole corn and mineralized salt blocks, these items are all bagged grain feeds (in 50 or 25 lbs. bags).

2. Price should include delivery.

3. Deliveries are usually necessary every 2-4 weeks. The quickest response time from ordering to delivery is optimal.

4. Availability of greatest number of products from one vendor simplifies ordering and delivery.

5. Proper practice and USDA regulations require that grain products be stored no longer than 30 or 60 days, depending on the exact product.

6. The whole corn has been delivered to us in a farm corn wagon (holding 1,000 lbs.) and that wagon has been left at the zoo at no additional charge. If a wagon was not provided, the corn would have to be bagged.

7. Advanced booking or contract pricing on grain products can result in higher prices due to widely fluctuating prices of grain commodities.

8. Radical changes in animal diets, such as changes in feed manufacturers, are considered poor animal husbandry. Such changes can be made if the transition is gradual (such as mixing the two feeds together but frequent feed changes can be detrimental to animal health. This is one reason why animal managers prefer to stay with one brand.

9. A second basic principle of feeding animals: we seek diets that are successful then stick with them. If an animal thrives on a given diet,

we don't change it; if the animal doesn't do well, we seek a better diet.

Our current vendor, Milan Center, has provided exceptional service. They deliver at a moment's notice, in blizzard or drought. They procure, transport, and provide us farm livestock (pigs, cows, sheep, chickens) at no cost to us. Other grain vendors we've tried have been less than satisfactory.

Jim Anderson
Assistant Director
Fort Wayne Children's Zoo

	Eliminates feed seperation. Provides balanced nutrition in every bite.
High energy	Excellent growth. Less feed required.
Complete ration	No need for mixing equipment.
All-In-One	Only one feed is needed from 0-20 weeks.
Flexibility	Adaptable to different programs. May be fed with scratch grains if desired. May switch to Complete Pullet Developer after 8 weeks.
Contains Amprol-Plus	Provides protection against coccidiosis.

SPECIAL CONSIDERATIONS:

Clean, fresh water should be available at all times.

EXPECTED CONSUMPTION:

Feed	Period	Estimated Feed Consumption by Season (lbs. per pullet)		
		Winter	Fall/Spring	Summer
Back Forty Starter/Grower	0-8 Weeks	4.3	4.1	3.9
Back Forty Starter/Grower	8-20 Weeks	13.2	12.4	11.7

Back Forty Starter/Grower

1370

Feed as the sole ration to chicks up to 4 weeks of age. Feed with scratch grains to chickens between 4 and 20 weeks of age.

GOAT POWER FEEDING PROGRAM

Kids Birth to 3 days 3 days to 4 months	Colostrum Milk Power-Lac Milk Replacer (5 pints/day maximum) Power-Mate Texturized (free-choice)
Growing Goats 4 months to 6-8 weeks before kidding	*14% or 16% Goat Power (1-2 lbs./head/day)
Dry Does 6-8 weeks before until kidding	*14% or 16% Goat Power (1-2 lbs./head/day)
Milking Does	*14% or 16% Goat Power (1 lb. to each 3 lbs. milk)
Bucks	*14% or 16% Goat Power (1-2 lbs./head/day)
All Goats	Master Mix 2:1 Mineral (free choice)

NOTE: From 2 weeks of age, high-quality hay or pasture should be available at all times. Loose free choice salt and clean, fresh water should be available at all times.

*14% Goat Power can be used with high-quality roughages. If roughage quality is questionable, 16% Goat Power should be used.

Baby pig pellet	High quality, extra durable pellets that prevent feed wastage and caking in feeders and improve palatability.
One feed for prestarter and starter	Simple, easy-to-use product. Fewer feeds to order and inventory.
Medication variations	Available in a variety of medication options to meet the needs of any operation.

MASTER MIX®
PRIMER®
BABY PIG STARTER
807

For use as a prestarter, begin feeding small quantities of Primer two times per day when pigs are 14 to 21 days of age. As consumption increases, gradually increase the amount of Primer offered. After weaning, feed Primer free choice as the sole ration until pigs are 40 to 50 pounds body weight.
